**HD600X-LV**

## ■ HD600X-LV

# The brighter the better...

Prepare yourself for life-size 3D games and movies! Designed for use with the latest HD Consoles and 3D Gaming PCs, the Optoma HD600X-LV home entertainment projector delivers this spectacular 3D experience right into your own home.

All this in such a compact size, combined with a stylish carry bag, means the HD600X-LV is also your perfect partner for sharing this mind-blowing experience with everyone, anywhere, anytime!

### 24P

Most movies are shot at 24 frames per second. To preserve the purity of the original image the HD600X-LV can accept High Definition sources at 24 frames per second and so to display movies exactly as the director intended.

### Supersized Images

With a blinding 2500 ANSI Lumens you can use this extra power for an extra-large screen. If you like your image big, the HD600X-LV makes them as big as they get! Home Cinema with a 5m screen is an awe-inspiring experience of truly phenomenal proportions.

### Integrated Audio

With its punchy on-board speaker, the HD600X-LV is the perfect solution for portable gaming or impromptu film screenings at a friend's house. Feel every explosion like you are part of the action! – Easily hook it up to external speakers to add that extra rumble; essential for the greatest home cinema experience.

### Lights on Entertainment

The HD600X-LV produces fantastic images even when the lights are on. Designed to be used in the same way as your conventional TV, the high brightness HD600X-LV can be used for television and film watching or playing the latest motion-controlled games without even dimming the lights.

## ■ HD600X-LV

# Expand your 3D Horizons...

The HD600X-LV is ideally partnered with the world's first 3D projector adapter; the Optoma 3D-XL. Enabling the HD600X-LV to display 3D broadcast signals; Sky 3D in the UK, Blu-ray 3D™ and 3D games from the Sony® PS3 or Microsoft® Xbox 360, the 3D-XL is what you need to be...truly 3D Ready!

The 3D-XL simply connects between a 3D source and the HD600X-LV:

# HD600X-LV

<sup>1</sup> "ANSI Contrast" is a recognised contrast measurement technique as described in the standard IEC 61947-1

The 3D features of Optoma projectors can only be used with compatible 3D content. Typical applications include use with 3D educational or 3D design and modelling systems. Support for 3D TV broadcast systems, (SKY in the UK) Blu-ray 3D<sup>™</sup> and 3D games from the Sony<sup>®</sup> PS3 or Microsoft<sup>®</sup> Xbox 360 will require the Optoma 3D-XL that is available separately.

Copyright © 2012, Optoma Europe Ltd. <sup>2</sup>Brightness and lamp lifetime will vary depending on selected projector mode, environmental conditions and usage. As is common with all lamp based projectors, brightness will decrease over the lamp lifetime. <sup>3</sup>Typical lamp life achieved through testing. Will vary according to operational use and environmental conditions. Xbox 360, Xbox, Kinect & Windows are registered trademarks of Microsoft Corporation in the United States and other countries.
