

ZD101

DLP®-Link™ 3D Glasses

Enter the 21st Century with
Optoma 3D hardware.

When partnered with an Optoma DLP® Link™ enabled projector, the Optoma ZD101 Glasses allow compatible content to be viewed in stunning stereoscopic 3D.

Our advanced single projector solutions create *life size 3D images* on any flat surface, inspiring the imagination while making this exciting technology simple, for everyone.

PRODUCT HIGHLIGHTS

Wireless 3D viewing using DLP® Link™ Technology:

Compatible with all Optoma 3D capable projectors.

Easy set-up:

Auto-sync with on-screen image.

Energy Efficient:

Auto Power-off to save battery life.

Durable:

Robust design with flexible arms.

Versatile:

Can be worn over prescription glasses.

SPECIFICATIONS

Model name	ZD101
Supported resolutions	All Optoma DLP® Link™ enabled projectors: XGA / WXGA / 720p
3D Refresh rate	120Hz (60Hz / eye)
Dimensions W x H x D (mm)	182 x 50 x 169
Weight	78g
Power	2x CR2032 Batteries (replaceable)
Battery Life	Up to 70 Hours
Range (Typical)	Up to 20M (Dependent on projected Image)
Operating temperature	5°C to 45 °C
Storage humidity	≤90%
Display Requirements	Projector / Display must support DLP® Link™

† 3D TECHNOLOGY

Using the inherent speed of DLP technology, Optoma 3D capable projectors can output video and images at an astonishing rate of 120Hz, allowing you to show full screen, full colour, stereoscopic 3D. The 3D effect is generated by splitting this signal into two standard video streams, one for each eye. Using DLP® Link™ technology, the 3D glasses synchronise with the image on screen to filter each stream to the correct eye. Your brain then combines the two streams to make them jump into life.

DLP® Link™ can only be used with compatible 3D content. Typical applications include use with 3D educational or 3D design and modelling software. Currently Optoma does not support 3D TV broadcast systems, SKY in the UK or 3D Blu-ray, though support for these applications may be added in future using additional hardware.
