

HD141X: Optoma launches all-round 1080p home entertainment projector

Created for super-sized Full HD 1080p home entertainment, the new Optoma HD141X projector is perfect for watching TV shows, live sports and movies or playing action-packed games on a huge screen.

Optoma's Head of Product Marketing, Justin Halls, said: "The HD141X is an all-round home entertainment projector, combining high brightness with cinematic picture performance to produce a big bright image in any living space."

This Full 3D 1080p projector, with powerful built-in speakers, produces bright vivid colours due to its 3,000 Lumen brightness - ideal for use without dimming the lights.

Easy connectivity

Two HDMI™ inputs allow the HD141X to be simultaneously connected via HDMI™ to games consoles, Blu-ray players or digital television set top boxes. This makes switching between sources literally the push of a button. It can even be turned into a smart projector by connecting a smartphone or tablet with a single cable using MHL to play games, stream videos and share photos on the big screen.

Built-in speakers

The HD141X comes complete with a built-in speaker that delivers powerful 10W audio, with exceptional sound quality. Despite the small dimensions of the projector, the level of audio created will easily fill a living space. An audio output is also included, enabling connection to external sound systems.

Gaming mode

The gaming mode setting is designed to optimise the projector for lightning response times, maximum contrast and vivid colours. This captures every detail, leaving gamers time to simply focus on winning.

Full 3D

With vivid colours, the 3D action literally jumps out at you in your living room. This means live sports, TV and movies can be enjoyed in stunning 3D making you feel part of the action.

ABOUT OPTOMA

Optoma is a world leading designer and manufacturer of projectors for business, education, professional audio/video and home entertainment.

For nearly two decades Optoma has been one of the few manufacturers to focus solely on projection. Systematically Optoma has contributed a product into every new development of projection and has pioneered new award-winning products on more than one occasion, targeting a spectrum of applications and environments.

Optoma's innovative products are carefully crafted to deliver crystal clear images of unrivalled quality by incorporating the latest DLP technology from Texas Instruments, together with advanced optical engineering expertise and dedication to superb product quality.

The Optoma Group has continental headquarters in Europe, the USA and Asia; whilst Optoma Europe, based in London, covers Europe, Middle East and Africa (EMEA). Local services are delivered from regional offices in France, Germany, Norway, Spain and Benelux and sales representatives in the Czech Republic, Dubai, Italy, Poland, Russia, Romania and Saudi Arabia.
